Using Guided Access with iDevices

Guided Access is a feature that allows users to temporarily restrict an i-device to one application while in use.

How to set up Guided Access:

Tap Settings > General > Accessibility > Guided Access

Here's what you can do:

• You can turn Guided Access on or off.
• You can set a passcode that controls the use of Guided Access and restricts the user’s ability to leave an active session.
• You can set whether the device can go to sleep during a session.

How to start a Guided Access session:

• Open the application you want to use.
• Triple click the Home Button.
• Adjust settings for the session.
• Tap “start”.

How to end a Guided Access session:

• Triple click the home button.
• Enter the Guided Access passcode you created.
