

## Computer and Related

Name of App	Platform	Description
Airtame	iOS	Airtame is a wireless presentation solution. You can use it for mirroring the screen of your computer or mobile device (using the Airtame app), to a larger display (e.g., TV or projector) that has the Airtame device plugged in. You can mirror your screen to one or multiple Airtame-equipped displays simultaneously.
Avaz AAC	iOS	Avaz AAC is an augmentative and alternative communication app that empowers children & adults having speech-related disabilities with a voice of their own. ... This allows users to grow steadily from using 1-2 word phrases to full sentences using Avaz AAC
CamFind	iOS	mobile visual search engine, allows you to search for anything on your mobile device just by taking a picture.
Dragon Anywhere: Dictate Now	iOS	Dragon Anywhere is a mobile dictation app that enables continuous dictation of documents, with no length or time limits. ... Dragon Anywhere makes it easy to create detailed and accurate documents, fill out reports and forms, or complete other paperwork— directly on your smartphone and tablet, all on-the-go
join.me - Simple Meetings	iOS	join.me includes audio and video conferencing by phone or internet (VoIP) so you can see and hear anything in real time... on your time. join.me lets you host audio calls, video calls, and share your screen* and any of your apps. Just one tap starts a scheduled meeting, a spontaneous meeting, or a conference call.
Skyle	iOS	Skyle is the world's first eye tracker for iPad Pro. With Skyle you can control the iPad completely with your eyes, for alternative access to apps, augmentative & alternative communication (AAC) and environmental control. Skyle hardware is needed for this app.
Symbo Talk AAC Talker	iOS	An app that talks for you by clicking on symbols (images or icons). The app has predefined communication boards from different areas of life, each board contains symbols (images). Clicking on a symbol reads it aloud and adds it to a sentence which can also be read.
