

AT & HOME DESIGN FOR DIVERSE POPULATIONS

There is a movement to make homes more flexible to meet people's needs as their lifestyles change. There are important features to consider when remodeling, building, buying, or renting a home that will reduce barriers and inconveniences. The three places in the average home which create the most barriers are the entrance, bathroom, and kitchen.

The following is a checklist of features which address some of the biggest barriers in many homes. Many of the basic features will meet an immediate need, can be done with limited resources and may not require structural changes. It is important to seek knowledgeable advice during the planning stages which will help to identify the costs and to set your priorities according to your immediate and future needs.

Entrance:

- Door at least 36 inches wide, to allow for a 34 inch clear opening when the door is open at a right angle

- No split-level entry
- No step up or step down to enter home
- Door locks that are easy to operate, such as keyless locks with remote control
- Lever-style door handles
- Peep-holes at heights for adults, children, and people using wheelchairs
- Good lighting both inside and outside the entrance
- No raised threshold
- A roof, canopy, or awning to protect the entrance from rain and snow
- Ample landing space both outside and inside the entry door

Kitchen:

- Anti-scald faucet with a single lever to turn on and off
- Appliance controls that are easy to read, easy to reach, and can be operated by touch as well as sight
- Easy access to storage (pull out shelves, lazy-Susan's in the corners)
- Good task lighting over sink, stove, and other work areas
 - Enough clear counter space to set down dishes next to all appliances and cupboards

Bathroom:

Basic

- Adjustable height, hand held showerhead, with controls that are conveniently placed and easy to operate

- Anti-scald faucet with a single lever to turn on and off
- Shower seat or platform, either built in or free standing
- Toilet seat height appropriate for the household- 17 to 19 inches high for middle age and older people, lower for children
- Mirrors placed for both standing and sitting
- Non-glare lighting

Ideas for Other Living Areas:

- Light switches reachable from the bedside and the door and located about 36 inches to 40 inches above the floor
- Telephone jack near the bed
- Extra electrical outlets near the bed, (i.e. for medical equipment or rechargeable items) placed 18-24 inches above the floor
- Swing clear hinges that add a little more maneuvering room by moving the door completely out of the doorway
- Adjustable height shelves and clothing rods
- Laundry on main floor, near bathroom and bedrooms
- Front-loading washer and dryer, place on platforms to reduce bending and kneeling
- Good task lighting in all areas
- "Smart Home" automation technology
